

Quality Policy Statement

Primary quality objective is to achieve total customer satisfaction through confidence in manufacturing, sales and service of fastener and related products.

The quality manual contains the methods and procedures by which this statement is fulfilled and provides the framework to ensure all activities are performed and delivery schedule is met.

Providing a quality product includes recognizing and understanding the need and expectations of our customers and end users while satisfying the requirements of Statutory and Regulatory Authorities.

The involvement of all staff contributes in recording analyzing and acting upon these need and expectations.

The management and staff are committed to complying with the requirements of ISO 9001-2015 management system (with exception of 8.3 clause-design of products) and continually improve its effectiveness.

The management has the responsibility of defining and documenting quality policy and objectives and to ensure the QMS and Quality policy are reviewed for continuing suitability.

Further, it is the responsibility of each employee to understand and carry out the quality procedures applicable to his/her work.
